

ELECTRICAL ENGINEER – Entry Level Electrical Systems for Buildings

Opportunity:

For a recent graduate with an interest in the construction or consulting industries and a desire to learn the facility design field. Build on current knowledge of electrical engineering by providing design engineering services for clients throughout North America. This key role will develop a broad set of engineering competencies, technical design knowledge, consultation and problem solving skills.

Position:

Reports directly to the Manager of Electrical Engineering. Participates on design teams to prepare drawings and specifications for lighting and lighting control systems, low and medium voltage power distribution systems, specification of basic material and methods, and development of control systems for mechanical and refrigeration systems. This position will proactively interact with the engineering teams.

Candidate:

- BSEE, BSEET, BSAE, BSAET or related degree; EI a plus
- Intelligent contributor: adds value, drives assignments to completion
- Curious in nature; Interacts effectively in a team oriented environment
- Proven self starter with the ability to manage time and work priorities independently
- Strong work ethic and leadership capabilities

Compensation:

Competitive compensation commensurate with experience, plus excellent benefits package; Hixson offers a team oriented work environment, opportunity for personal and professional growth, challenging projects, and ownership potential.
